

MS in Child Life

The master's degree in child life (<https://www.apu.edu/bas/programs/masters-in-child-life/>) is designed to prepare graduates to successfully complete credentialing as child life specialists, who are allied health care professionals with expertise in helping children and their families navigate traumatic and challenging experiences, particularly health crises.

In addition to rigorous coursework, this is an applied/clinical program, with students required to complete a 120-hour practicum in child life followed by a 600-hour hospital internship. The program comprises 42 units and can be completed in 18 months, with available start times in spring and fall. Courses take place primarily in the evenings. There is also online synchronous learning for our master's degree in child life and the Advanced Standing (<http://catalog.apu.edu/academics/college-nursing-health-sciences/school-health-sciences/child-life/advanced-standing-child-life-ms/>) option.

Requirements

Code	Title	Units
