

School Nurse Services Credential Option

The School of Nursing is approved by the California Commission on Teacher Credentialing (<https://www.ctc.ca.gov/>) to offer the School Nurse Services Credential (SNSC) program. The credential can be a stand-alone nondegree program for applicants with a baccalaureate degree in nursing, or it can be taken as part of the Master of Science in Nursing degree. School nurses work with K-12 student populations to promote health and oversee health education curriculum, as well as implement student health maintenance plans.
